PROFESSIONAL SUMMARY

Computer Science senior with SAP Technology Consultant certification and hands-on experience in enterprise platforms, business process automation, and AI-driven systems. Founded a 160+ member Technology Consulting Club and completed an AI internship at Taif Health Cluster, focused on automation and real-world healthcare applications.

EDUCATION

B.Sc. Computer Science - Taif University, Saudi Arabia

Expected June 2026

Relevant Coursework: Artificial Intelligence, Data Structures and Algorithms, Software Engineering, Systems Analysis and Design, Project Management, Human-Computer Interaction

CERTIFICATIONS

SAP Technology Consultant

SAP Activate methodology, module fundamentals, solution design, digital transformation

McKinsey Forward Program

Structured problem-solving, root-cause analysis, data-driven decision-making

Mustashar Accelerator

Consulting frameworks, stakeholder engagement, and case analysis in simulated client engagements

EXPERIENCE

AI Co-op Trainee - Taif Health Cluster, AI Department

2024 · 2 months

- Applied automation and web scraping using Ollama and Docker in a live healthcare environment, contributing to internal AI workflows and tools
- Trained 10 students on web scraping and automation as part of a departmental initiative

Founder - Technology Consulting Club (TCC), Taif University

2025 – Present

- Founded and scaled the university's first technology consulting club to 160+ members; built a custom membership web platform handling student registrations, CV submissions, and application reviews
- Engineered an automated email system using Resend API to notify applicants of acceptance, application status updates, and meeting scheduling - reducing manual follow-up communication

Events Consultant - Robotics Engineering Club, Taif University

Jan 2023 – Present

- Delivered 25+ events coordinating 6+ teams and stakeholders, supporting events reaching 1,000+ participants
- Analyzed workflow challenges and implemented process improvements across club operations

PROJECTS

Early Seizure Prediction Using Adaptive Learning and Multi-Modal Smartwatch Sensors

2025

- Built a full-stack healthcare prediction system integrating smartwatch data for early seizure prediction; led a 9-member team through full project lifecycle within 5 months, training the model on 110 epilepsy patients
- Developed a FastAPI backend with 85+ endpoints and a Flutter mobile app integrated with smartwatch data via OAuth API, collecting 6 biometric signals
- Developed an adaptive CNN-LSTM model achieving 83% accuracy and 0.80 AUC; engineered a 3-tier risk classification system (High, Medium, Low) with automated email alerts to patients and caregivers up to 30 minutes before a predicted seizure

Internship Management Platform - Taif Health Cluster

2024

- Built an enterprise platform for Taif Health Cluster centralizing student internship registration and automating internal staff workflows across departments
- Reduced manual effort by 40%; delivered reporting dashboards and end-user documentation

SKILLS

SAP and ERP: SAP Activate, ERP Fundamentals, Digital Transformation, Solution Design, Business Process Analysis

Technical: Python, SQL, Machine Learning, FastAPI, Flutter, Docker, OAuth API, Web Scraping, Web Development, Excel, Git

Analytical and Business Skills: Requirements Analysis, Stakeholder Communication, Process Optimization, Team Leadership, Documentation, End-User Training

Languages: Arabic: Native | English: Fluent | French: Upper-Intermediate

Tools and Platforms: Postman, Docker, GitHub, VS Code, Jupyter, Anaconda, Excel, Notion
